

LECs and Cable companies have not provided fair offerings for their services. Please provide a mechanism for competition to keep the quality of services High. Competition requires competitors to be alive. If the FCC lifts the dominant classification from the Local Exchange Carriers (Bells), it will limit competition to a duopoly consisting of a bell and a cable company - this is simply not acceptable from my point of view [consumer point of view]. Competition in the American Telecom marketplace will not be incentivized, it will be torpedoed. ISPs and CLECs will die, consumers will be deprived of choice and the FCC will be wholly to blame for the travesty.
